Italian artist turns Google Street View glitches into masterpieces

By DAILY MAIL REPORTER

PUBLISHED: 22:16 EST, 29 December 2013 | **UPDATED:** 22:16 EST, 29 December 2013

Most people use Google Street View to get around, scout a neighborhood or pretend they are on vacation, but one artist had another idea.

Emilio Vavarella, from Italy, has taken technical glitches found on the ubiquitous service and made them into something greater.

'Report A Problem' is a showcase of some of the more unusual Street View glitches found by Mr Vavarella.

Other projects have attempted to illustrate how to view local nature on the site, or to see flash mobs - but nothing has been done with the glitches until now.

The project is made up of 100 such images, which **Mr Vavarell**a made a selection of available to MailOnline.

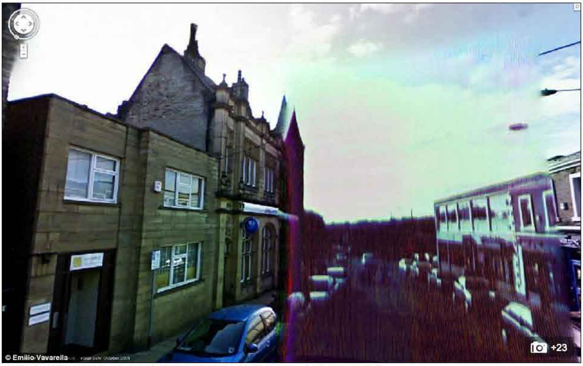
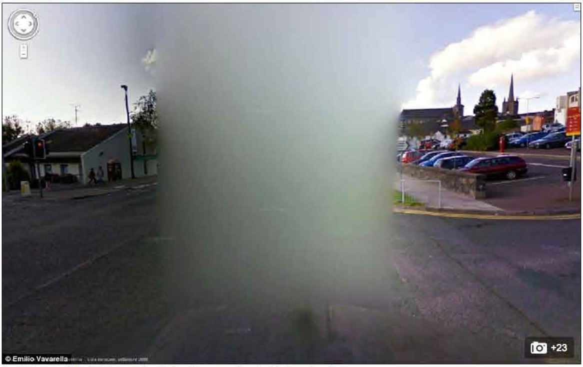
All jammed up: Three images appear to be jumbled together in this glitch



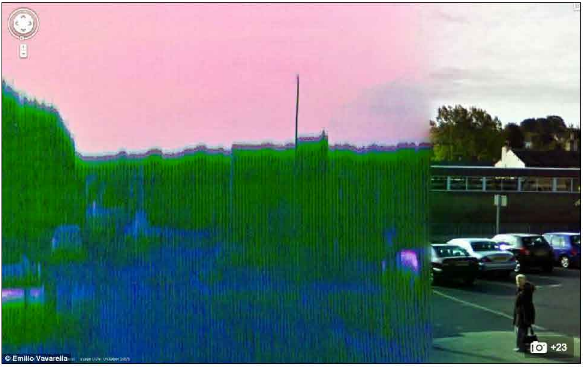
© Emilio Vavarella
+23

Stepping back in time: This glitch makes it look like images from now and the past have been spliced together



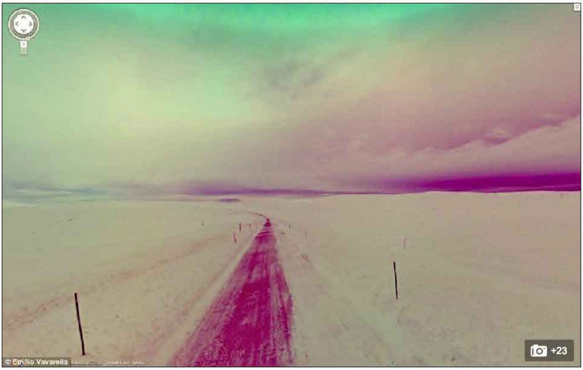
© Emilio Vavarella
+23

Locally heavy fog: This glitch shows an imperfection that appears to be a tiny bit of very dense fog



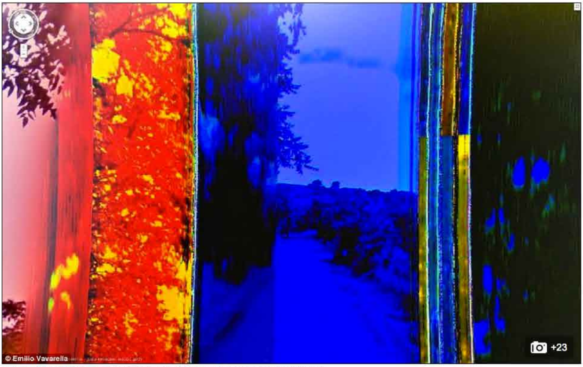
© Emilio Vavarella
+23

Inside the matrix: The living looks to intercede with the digital in this parking lot



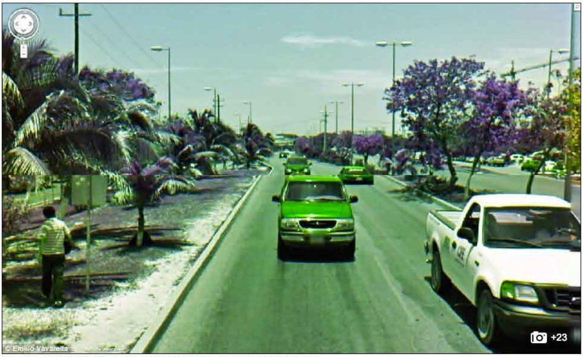
© Emilio Vavarella
+23

No filter: This image looks like another Instagram job, but it's just faulty Street View cameras



© Emilio Vavarella
+23

It's like 3D without the glasses: This street view looks like a 3D movie, but without the glasses



© Emilio Vavarella
+23

Glow in the dark cars: The color is so far off in this shot that cars appear to glow in the dark
